JUSTIFICATION FOR REAL WORLD TESTING APPROACH

This is a Real World Testing Plan for below the certification criteria:

§170.315(b)(10) - Electronic Health Information export.

Certified Health IT is utilized by providers in Psychiatry settings. Certification criteria involving the data export capabilities as defined in the Electronic Health Record (EHR) certification requirements will be tested in this plan. All certification criteria listed in this plan are not part of standard workflows in these settings, yet the Certified Health IT Module is capable of exporting patient health information in a structured and standardized format, including C-CDA and JSON, ensuring full compliance with the certification requirements. The approach chosen will identify the frequency of data export requests made and completed during the interval, monitoring patient data portability and accessibility. The goal of this approach is to demonstrate that both the data portability and conformance capabilities of the Certified Health IT module meet the requirements of the specified certification criterion.

STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) STANDARDS UPDATES

Standard (and version)	USCDI v1
Updated certification criteria and associated product	B10
Health IT Module CHPL ID	15.04.04.3184.Gala.01.00.0.240103
Date of ONC ACB notification	01/03/2024
Date of customer notification	NA
Conformance method and measurement/metric(s)	Export functionality for B10

ASTP

MEASUREMENT(S)/METRIC(S) USED IN OVERALL APPROACH

Description of Measurement/Metric

Measurement/Metric	Description
Export functionality	This measure focuses on the ability of the system to export a complete electronic health record for a patient or a group of patients. It specifies the format and frequency of data exports, ensuring that health information can be securely transferred and shared with other systems, providers, or organizations. The goal is to support patient transitions, data portability, and regulatory compliance, allowing patients or authorized parties to have access to their complete health information in a standardized, interoperable format.

Associated Certification Criteria

Measurement/Metric	Associated Certification Criteria	Relied Upon Software (if applicable)
Export functionality	§170.315(b)(10) - Electronic Health Information export	NA

Justification for Selected Measurement/Metric

Measurement/Metric	Justification
Export functionality	This measure focuses on the ability of the system to export electronic health information (EHI) in a standardized format. It ensures that healthcare providers can efficiently transfer patient records across different systems or provide patients with access to their health information. The B10 measure validates the system's capability to export EHI while adhering to the technical standards for interoperability and data privacy. By evaluating the frequency and accuracy of data exports, this measure ensures compliance with certification criteria and supports the seamless exchange of health information.

Care Setting(s)

Care Setting	Justification
Psychiatry	This Certified Health IT is used in Psychiatry Care Setting. We have providers from this setting using our Certified Health IT.

Expected Outcomes

Measurement/Metric	Expected Outcomes
Export functionality	- The Real World Testing approach will ensure that certified health IT modules comply with the required technical standards and certification criteria for electronic health information (EHI) export, allowing providers and patients to easily retrieve and export their health data. - Providers and patients (or their authorized representatives) will be able to export EHI in structured formats that meet certification requirements, ensuring data portability and interoperability with other systems or platforms. - Error rates during the EHI export process will be monitored, tracked, and trended over time to identify issues, drive improvements, and ensure ongoing compliance with certification standards.

SCHEDULE OF KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Release of Real World Testing plan documentation shared with office staff and providers using Certified Health IT module.	Psychiatry Care Setting	December 15-31, 2024
Collection of information as stated in the plan.	Psychiatry Care Setting	January 1-3, 2025
Evaluate the frequency of PHI exchange and take measures to improve the process.	Psychiatry Care Setting	Quarterly, 2025
Analysis and Real World Testing report creation.	Psychiatry Care Setting	January 1-3, 2025
Submit Real World Testing report to ACB (per their instructions).	Psychiatry Care Setting	January 15, 2025

ATTESTATION

This Real World Testing plan is complete with all required elements, including measures that address all certification criteria and care settings. All information in this plan is up to date and fully addresses the health IT developer's Real World Testing requirements.

i. Certified health IT continues to be compliant with the certification criteria, including the required technical standards and vocabulary codes sets; certified health IT is exchanging EHI in the care and practice settings for which it is marketed for use; and EHI is received by and used in the certified health IT.
